

POND CARE PRODUCTS AQUA ACTIV

	BACTO PLUS – starter bacteria	GROUND CLEAR PLUS – silt remover	O2 PLUS – oxygen stabiliser
	<ul style="list-style-type: none"> Prepares the pond water for fish by adding vital organisms and minerals. Biological self-cleaner. Hazardous combinations caused by rotting processes are neutralised biologically by bacteria. Important: ensure that the water is re-circulated! Optimal supplement: Oxygen Stabiliser. 	<ul style="list-style-type: none"> Focused prevention of plant accretion, long-term turbidity, and algae blooms. Special high-performance bacteria reduce organic debris. Important: ensure good aeration through water movement. Optimal supplement: Oxygen Stabiliser. 	<ul style="list-style-type: none"> Works from the pond floor up and thus prevents formation of fermentation gas, which is hazardous for living organisms. Supports the organic self-cleaning properties of the water. Reduces formation of algae and slime and neutralises toxic waste products. First aid for oxygen deficiency.
Bottle	500 ml for 10,000 l	500 ml for 10,000 l	500 ml for 10,000 l
Large canister	5 l canister for 100,000 l	5 l canister for 100,000 l	5kg bucket for 100,000 l
Optimal supplement	Oxygen Stabiliser	Oxygen Stabiliser	–

	PH MINUS – pH value minus	CARBONATE PLUS – Hardness plus	CRYSTAL PLUS – Crystal clear instant clarifier	VITAL 3 – pond vitamins
	<ul style="list-style-type: none"> Natural agent for reducing the pH value. First aid for excessive pH values, prevents ammonia poisoning. Important: Make sure the CH value is sufficient! Optimal supplement: Hardness Plus. 	<ul style="list-style-type: none"> Increases the carbonate hardness in the pond water. Treats soft fountain water or rain water for filling. Stabilises the calcium/carbonic acid balance, which also determines the pH value. 	<ul style="list-style-type: none"> Clears green, murky water (particularly if there is algae bloom). Harmless to plants and animals. Is effective against the finest pollutants such as phosphates and heavy metal combinations. The flocculation that results can be removed with the Pondovac pond vacuum or with a net. Important: ensure that the water is re-circulated! Optimal supplement: Hardness Plus and Ph Value minus. 	<ul style="list-style-type: none"> Contains vitamins, minerals, and trace elements for promoting fish health, as well as nutrients for regulating the filtering biology and water quality. Stabilises the pH value and the oxygen content of the pond.
Bottle	500 ml for 10,000 l	500 ml for 5,000 l	500 ml for 5,000 l	10 bags for a total of 50,000 l
Large canister	5 l canister for 100,000 l	5kg bucket for 50,000 l	5 l canister for 50,000 l	–
