

# Control Packs & Tap Connectors

Several components are required when a tap-based irrigation system is installed. To make your life easier and to save time and money, we have put together a pack containing the essential items required for a reliable system. All components are of trade quality and we even include stainless steel screws and bolts to prevent rust marks damaging painted walls.

Code	Description	Price
CTP1030	Video-2 Plus control pack <i>The key components for a reliable tap-based system, all in one convenient pack; outlet on timer 3/4" BSP</i>	£79.70
CTP1040	Video-2 Plus control pack with pressure reducer <i>Designed for use with low-pressure Porous pipe systems; reduces pressure to 1 bar; outlet on timer 3/4" BSP</i>	£87.62
CTP0030	Video-2 control pack (original) <i>Control pack using the original Video-2 timer has smaller dimensions and is good value for money; outlet on timer 1/2" BSP</i>	£82.51
CTP1060	Duplo control pack - two outlets <i>Two outlets from one timer, with all the components to run two systems neatly from one tap; outlets on timer 1/2" BSP</i>	£144.64

*Video-2 Plus control pack - single outlet (tap not included). The key components for a reliable tap-based system - all in one convenient pack*

The control pack includes:

- one Claber timer
- a professional filter with a 100 micron stainless steel gauze
- an aluminium mounting bracket with stainless steel screws and plugs
- a Procell alkaline battery
- 1m of black hose and two high quality hose connectors

Video-2 (original)

We recommend all timers should be removed from the tap before winter to protect them from frost
